Securing Financial Success

Directors are charged with the governance of their clubs and must ask the right questions to ensure financial success, growth and sustainability. Greg Russell, Partner Russell Corporate Advisory will provide critical guidance on markers of financial success and address the new safe harbour provisions providing boards room to review, revise and redirect their operations if needed.

Due Diligence – the Fine Print and Ethical Practices

Many instances in the recent past have given pause to boards to consider their level of due diligence when approving supply contracts, which prove to be unconscionable or monitoring club performance, to ensure the club is not exposed to poor ethics, malpractice and serious financial risk. Debbie Organ, Learning & Development Executive will highlight the key markers of ensuring minimal risk to club operations through greater due diligence.
