Data & Insights Research

OVERALL:

- Registered clubs contributed 9 billion AUD in social and economic value in 2022 ([Economic and Social Impact of Clubs in NSW 2022](#)). Its distinctive composition and role in the broader economy produces unique business performance outcomes. This insight report draws on the most in-depth datasets available to present a holistic view of the industry's performance across gaming, financials and non-gaming spend. Examining these three areas together offers a more accurate and complete representation of the club industry.

WHERE THE DATA COMES FROM:

- Liquor & Gaming NSW
- Australian Bureau of Statistics (ABS)
- Annual report data from NSW registered clubs
- Commonwealth Bank

KEY TAKEAWAYS:

- **Income composition:** Gaming remains the largest income source at **45.1%** in 2025, but clubs are diversifying income streams with bar, restaurant, hotel and other operating revenues.
- **Major expenses:** Salaries and wages are the largest expense at **43%**, increasing by **+5** percentage points since 2020, with administrative costs also significant.
- **Prevalence of financial distress:** ClubsNSW has internally developed a classification framework for clubs based on financial performance. Over **50%** of clubs are classified as 'Unbalanced' or 'Distressed' in 2025, facing profitability challenges that strain liquidity and solvency, ultimately forcing reliance on credit and loans.
- **Non-gaming revenue trends:** Non-gaming income accounts for **55%** of revenue but has seen slowed growth recently, with the club industry recording the fourth lowest growth rate among comparable industries (cafes, pubs & taverns, retail) as of May 2026.
- **Gaming revenue growth (Mar 2018 to Mar 2026):** Although gaming revenue shows an average annual growth of **7%**, the compound annual growth rate is **3.8%**, slightly

above inflation, indicating limited real growth over eight years. NSW ranks second in gaming machine revenue growth behind QLD.

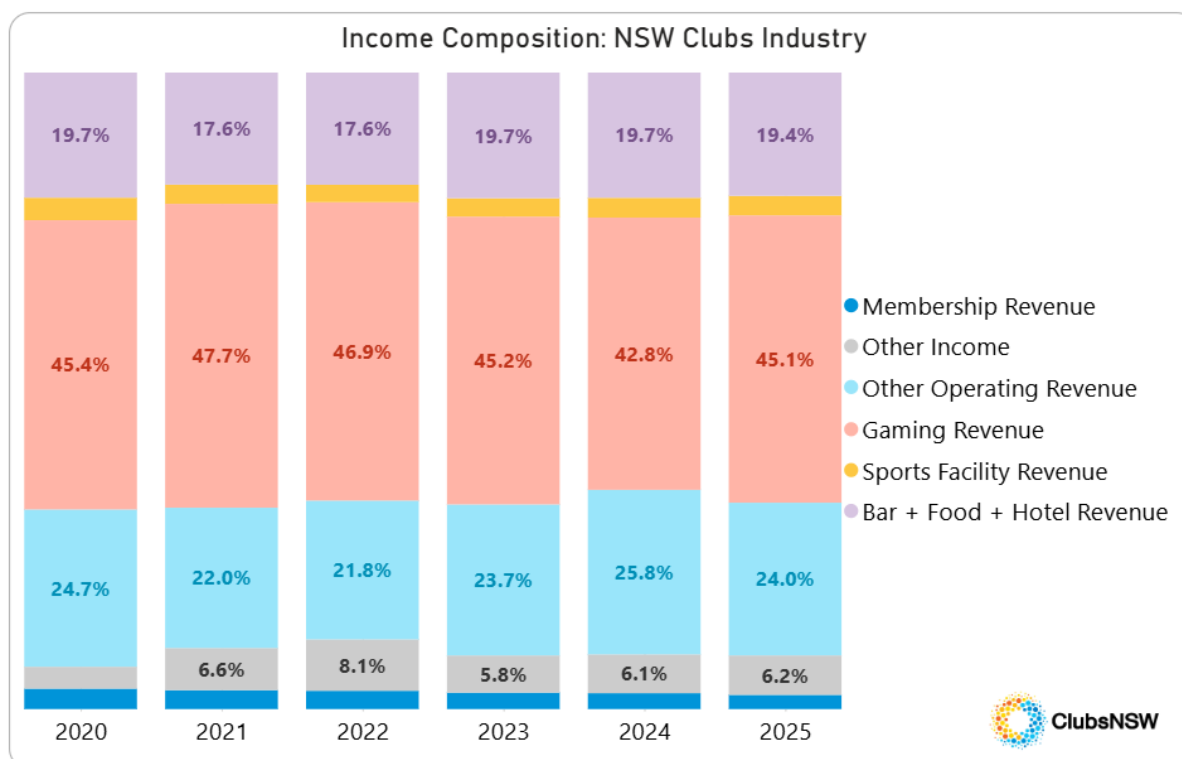

FINANCIALS:

ClubsNSW has compiled a longitudinal financial dataset, updated annually, covering more than 776 individual clubs, built from annual reports spanning 2020–2025. The data has been standardised and transformed to create one of the most complete financial records for the industry, enabling in-depth analysis of financial composition and overall sector health. These harmonised datasets support robust benchmarking, trend analysis and actionable insights into the club industry's financial performance.

COMPOSITION:

- **Income:** Club revenue streams vary, but gaming remains the largest source, accounting for **45.1%** of revenue in 2025. The next-largest contributors are other operating revenue and bar, restaurant and hotel income. Since 2021, clubs have gradually reduced their reliance on gaming by **+2.6** percentage points as they diversify into alternative income streams. *Other operating revenue* covers miscellaneous items that could not be classified into the main categories such as event income, sponsorship, commissions and entertainment.

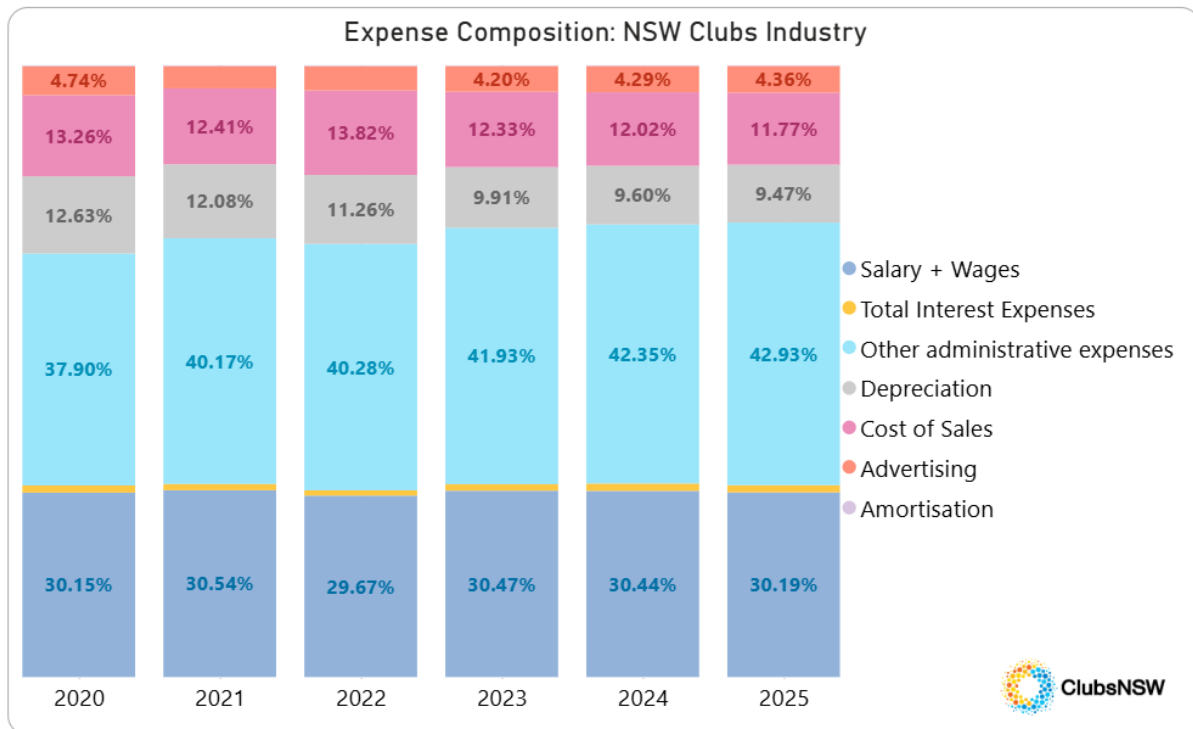

INCOME COMPOSITION: NSW REGISTERED CLUBS

(Source: ClubsNSW | Data & Insights | Annual report data)

- **Expenses:** The largest expense for clubs is other administrative costs, which account for **43%** of total expenses and have increased by **+5** percentage points since 2020; administrative costs which are comprised of line items such as rent paid, donations, operating lease expense, finance lease and hire-purchase charges representing a substantial share of overall spending.

EXPENSE COMPOSITION: NSW REGISTERED CLUBS

FINANCIAL HEALTH:

CLUBSNSW FINANCIAL HEALTH TIERS:

- ClubsNSW has developed a financial viability score for the industry that centres on three pillars: liquidity, profitability and solvency. By measuring the key metrics that drive each pillar and applying calibrated weightings, the score not only assesses the sector's overall financial health but also highlights specific areas for improvement. The industry's venues are grouped into five distinct segments, allowing comparisons and targeted insights tailored to different types of clubs.

CLUBSNOW FINANCIAL TIERS

Strong	Reliable	Stable	Unbalanced	Vulnerable	Distressed
High performers of the Association. They have high scores across cash flow, profit and debt management, meaning they are firing on all cylinders.	Consistent and dependable performers. While they may not be breaking records, they have balanced risk and enough "gas in the tank" to stay steady for the long term.	Currently safe and secure, usually because they own their assets and have little debt. However, they aren't growing quickly or making high profits, so they are essentially "comfortable".	These clubs have a major strength but also a glaring weakness. For example, a club might be making great profit but has zero cash in the bank, or it might have a huge cash pile but a failing business model.	Still operational, but they are "living on the edge". They have very little room for error, and a single bad month or an unexpected bill could push them into a crisis.	In significant financial trouble and are failing across multiple categories. In many cases, their current business model is no longer sustainable on its own.

- Despite recent growth in gaming revenue across the industry, many clubs may be facing a quiet crisis: as of 2025, over half of registered clubs in the sample are classified as Unbalanced (**25.7%**) or Distressed (**31.9%**). To understand what "Distressed" means, imagine a household budget where income barely covers essential bills, there is no buffer for unexpected expenses and debt is mounting, Distressed clubs exhibit the same symptoms: weak cash flow, low liquidity and high leverage, leaving them vulnerable even when headline revenues rise.

CLUBSNOW FINANCIAL TIERS: FY25

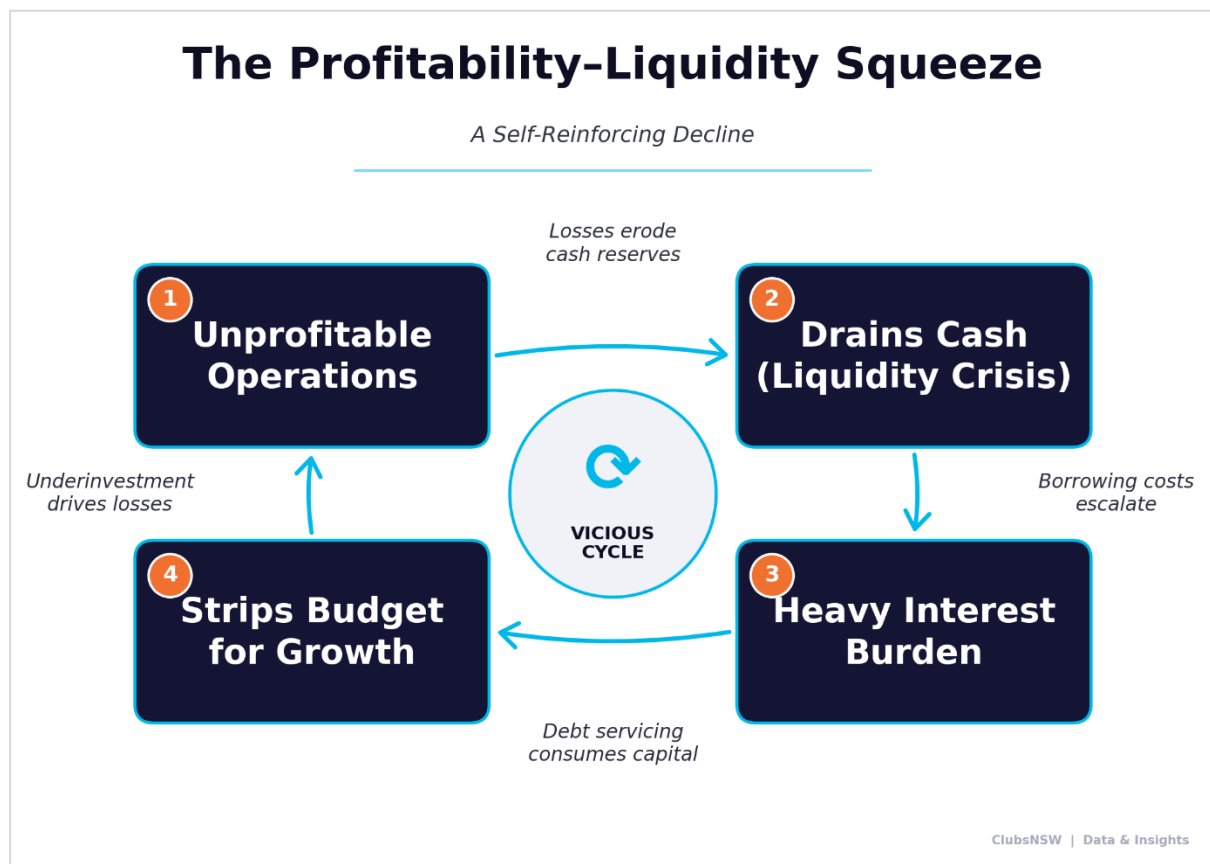

Financial Year		2025	
Tier	Count of Sample	% of Total	
Strong	130	20.0%	
Reliable	1	0.2%	
Stable	118	18.2%	
Unbalanced	167	25.7%	
Vulnerable	26	4.0%	
Distressed	207	31.9%

THE PROFITABILITY-LIQUIDITY SQUEEZE:

- The root issue is profitability. The club is spending more to run day-to-day operations than it brings in. This immediately dries up its ready cash (liquidity), meaning there is no safety net for immediate expenses. To survive, the venue has to rely on credit cards and loans. This triggers a stressful chain reaction: the more debt the club takes on just to pay its basic expenses, the weaker its overall financial foundation becomes, threatening its long-term survival (solvency). We know that historically registered clubs are debt averse but may be forced into taking on debt to keep operations going.

(Source: ClubsNSW | Data & Insights | Financial viability analysis)

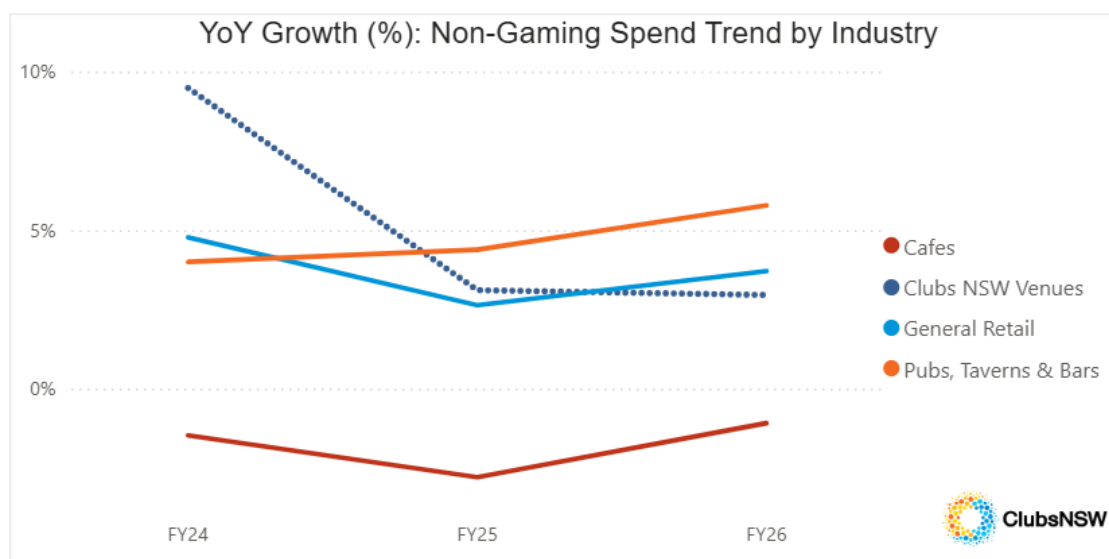

- Across ClubsNSW's sample of 649 registered clubs, there is generally no solvency concern: the sector has historically been debt-averse and maintained relatively healthy debt levels. However, liquidity and profitability have lagged, reflecting a business model that often absorbs costs internally, making it difficult to contain operational costs while sustaining margins. It's possible that clubs have often

absorbed these costs instead of passing the burden onto members. That tension has been amplified by rising essential operating expenses such as electricity, insurance and compliance which place additional pressure on clubs' ability to convert revenue into reliable cash flow and profit.

NON-GAMING SPEND: (NSW gaming year: Sep to Aug)

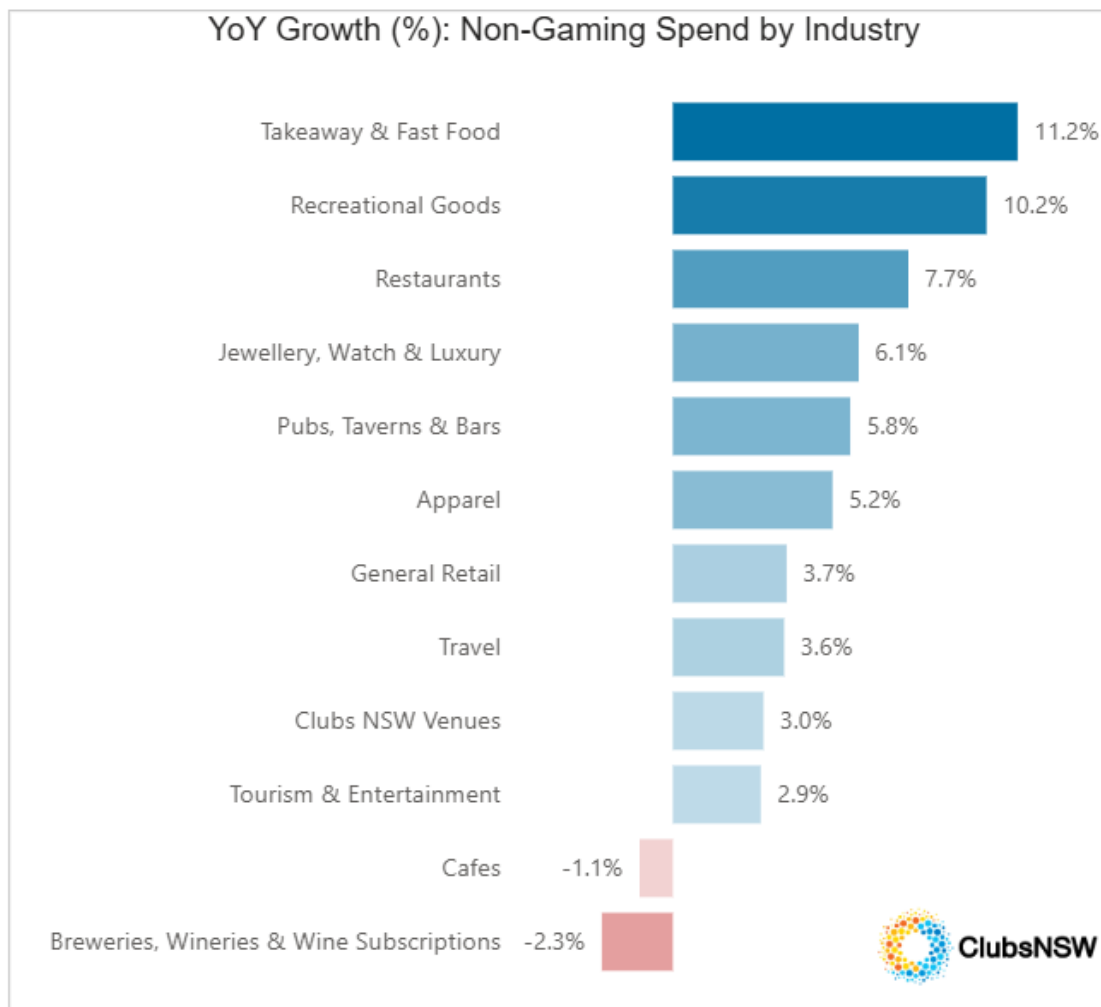

- In 2025, gaming revenue accounted for **45%** of the club's industry income — that suggests the **55%** of the industry's income is generated from non-gaming activities.
- Despite attracting an estimated **1.1 million** customers each month across the state, non-gaming spend has struggled to keep pace with inflation over the past two years. In FY24 NSW clubs recorded a **9.3%** increase in non-gaming spend, the strongest growth among comparable industries; by May 2026 that momentum had slowed considerably, with the club sector posting a **+3.0%** growth rate — the fourth-lowest in our comparison and only marginally ahead of tourism/entertainment (**+2.9%**), cafes (**-1.1%**), and breweries/wineries and wine subscriptions (**-2.3%**).

GAMING PERFORMANCE: (NSW gaming year: Sep to Aug)

- At face value, gaming growth in the club industry looks strong, averaging **+7%** per year over the past six years, but a clearer picture emerges when we examine the compound annual growth rate (CAGR). CAGR smooths year-to-year volatility and captures cumulative change, helping to distinguish steady, sustainable growth from short-term spikes. Assessing gaming performance with CAGR alongside annual figures gives a more accurate view of the sector's long-term momentum.
- ClubsNSW maintains detailed gaming records that capture approximately **90%** of gaming spend across NSW clubs, making it one of the most comprehensive datasets on gaming performance in the sector. These records enable granular analysis of revenue patterns, machine performance and regional trends, supporting robust benchmarking and evidence-based decisions.

- Over the past eight years the club industry's compound annual growth rate (CAGR) was **3.8%**, while inflation (CPI) averaged **3.3%**, so the sector only slightly outpaced inflation. Put simply, CAGR is the steady yearly rate that would take you from the starting value to the ending value if growth was smooth; the simple average of annual growth rates just adds each year's percentage and divides by the number of years, so a few very strong years can make that average look better. Because CAGR accounts for compounding and the ups and downs between years, it gives a more realistic picture of long-term growth.

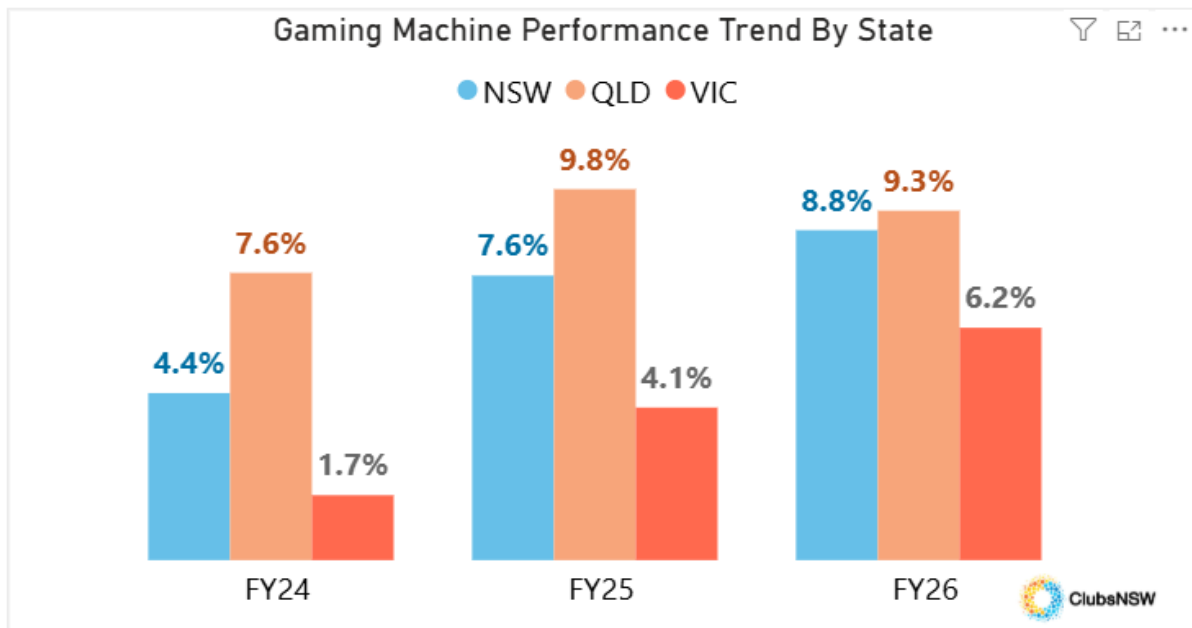

COMPOUND ANNUAL GROWTH RATE (CAGR): AU CPI VS GAMING (NSW CLUBS)

(Source: ABS, Liquor & Gaming NSW)

- Year-over-year, every state recorded gaming machine revenue growth, with NSW ranking second behind QLD. QLD's growth has been particularly strong at over **9%** in FY25 and FY26. Victoria has also seen a pickup in percentage growth. Over the past two years, NSW and Victoria have trended like for like, each posting over a **+4** percentage-point increase in gaming machine revenue.
