

ClubsNSW

Data & Insights **Research**

September 2026

Patrick Sanders-McClain

Key Takeaways

- **Profitability:** The profitability pillar remains the industry's greatest financial challenge according to the CNSW Financial Viability Framework. Despite generating sufficient income to remain operable, clubs consistently operate with thin profit margins, with operating expenses accounting for more than **90%** of total income.
- **Non-Gaming Revenue Trends:** Although club venue sales growth trails the broader NSW average, there was an observed improvement compared to GY25.
- **Demographics in Club Venues:** NSW discretionary spend grew at **+7.3%** year-over-year. The club industry was also successful at producing a positive growth rate of **+4.1%**.
- The bulk of non-gaming spend came from persons aged 45-74, accounting for an estimated **52%** of total spend in club venues. Yearly spend growth was primarily driven by younger and older aged groups 18 to 24 and 75+.
- **Gaming Performance:** After a strong start to the gaming year, gaming performance within NSW has tapered off. While yearly growth is still outpacing inflation, it now sits slightly below GY25 levels.

Overview

Registered clubs contributed \$9 billion AUD in social and economic value in 2022 ([Industry Reports - ClubsNSW](#)). Its distinctive composition and role in the broader economy produces unique business performance outcomes. This insight report draws on the most in-depth datasets available to present a holistic view of the industry's performance across gaming, financials and non-gaming spend. Examining these three areas together offers a more accurate and complete representation of the club industry.

Where the Data Comes From

- Liquor & Gaming NSW
- Australian Bureau of Statistics (ABS)
- Annual report data from NSW registered clubs
- Commonwealth Bank
- Restaurant & Catering Industry Association of Australia

Financials

As reported in the May 2026 Industry Snapshot ([ClubsNSW Industry Snapshot Report - ClubsNSW](#)), ClubsNSW has developed a framework to assess the industry across three specific pillars. As covered previously, the industry remains very debt averse with enough cash reserves to handle immediate obligations but struggles with profitability and has been defined as its weakest pillar.

CNSW Financial Viability Framework

ClubsNSW | Strategy & Insights

Source: CNSW Financial Viability Framework

Understanding the Profitability Pillar of Clubs

CNSW Framework looks at three distinct ratios to assess the profitability of clubs:

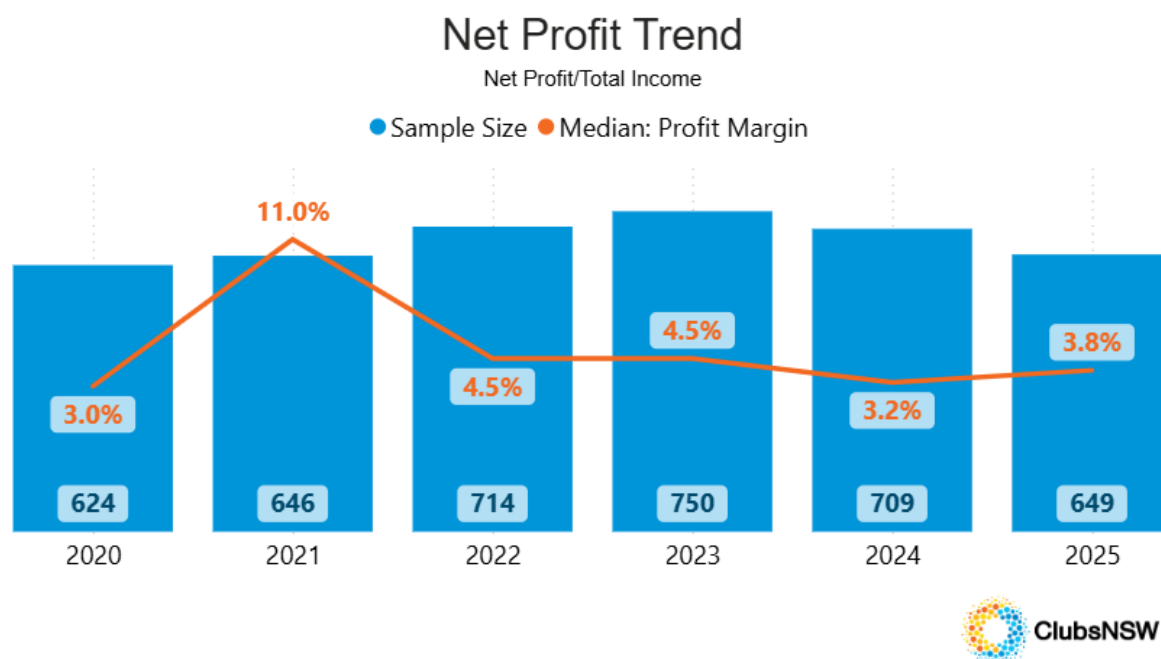

- **Operating Profit Margin:** EBIT / Revenue
- **Net Profit Margin:** Net Income / Total Income
- **Operational Efficiency Ratio:** Operating Expenses / Total Income

These metrics are combined with equal weightings for each individual pillar following a normalisation and data capping process. This allows CNSW to compare clubs of different income bands and localities by placing the focus on efficiency versus total outcomes.

Excluding the pandemic period, industry net profit margins have consistently hovered between **3%** and **5%**. In this framework, net profit margin represents the percentage of *total income* that remains as actual profit, capturing the true bottom line. The industry has historically generated lower profit margins than the broader hospitality sector, where many venues report net profit margins of between **+5%** and **+10%** (R&CA 2025 Industry Benchmarking Report, p. 28).

Due to the diverse mix of club types, size and income, profit margins can vary. In FY25 larger clubs generated net profit margins of **+8.2%**, while medium and small clubs, who account for over **80%** of the industry within NSW, produced net profit margins of **+3.8%** and **+2.6%** respectively.

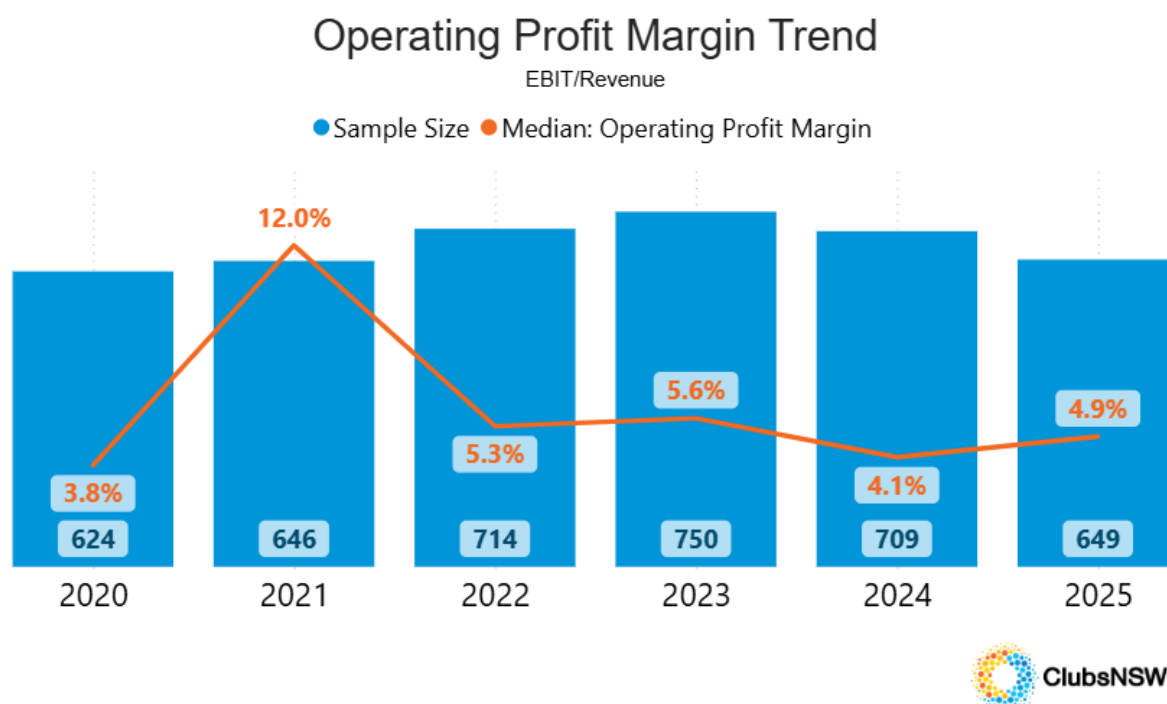

Median Net Profit Trend: Club Industry

Source: ClubsNSW | Data & Insights | Annual report data

Operating Profit Margin Trend (EBIT / Revenue)

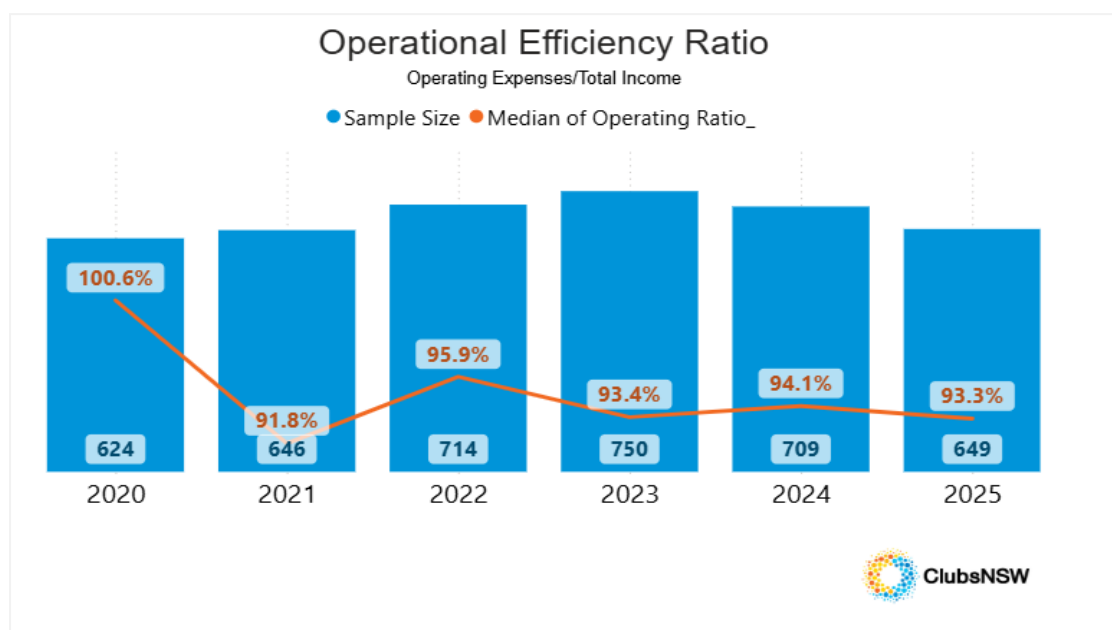

Operating profit margin reveals how much operating cash is generated for each dollar of revenue earned. The club business model works to keep the majority of clubs operable; however, thinner efficiency margins make clubs susceptible to minor shifts in the market, as club management may lack the flexibility to combat unexpected expenses.

Source: ClubsNSW | Data & Insights | Annual report data

Operational Efficiency Ratio (Operating Expenses / Total Income)

Operating efficiency ratio measures how efficient a club's management is at keeping costs low while generating income. Clubs earn enough income to cover operating expenses; however, operating expenses have consistently accounted for more than **90%** of a club venue's income, leaving a small portion available for-profit generation.

Source: ClubsNSW | Data & Insights | Annual report data

Profitability

The profitability pillar remains the industry's greatest financial challenge according to the CNSW Financial Viability Framework. Despite generating sufficient income to remain operable, clubs consistently operate with thin profit margins, with operating expenses accounting for more than **90%** of total income.

Clubs balance their financial performance with the delivery of services, facilities, and experiences that support members and local communities. This can create additional cost pressures and limit a club's ability to remain flexible and adjust when operating conditions change.

Non-Gaming Spend

NSW discretionary spend grew at **+7.3%** year-over-year. The club industry was also successful at producing a positive growth rate of **+4.1%**.

Although the bulk of spend came from persons aged 45-74, who accounted for an estimated **52%** of total spend in club venues, yearly spend growth was primarily driven by younger and older aged groups 18 to 24 and 75+.

Club venues were particularly effective at attracting younger demographics aged 18 to 24. Total spend grew **+13.2%** year-over-year. This customer segment spent more but also did so with higher frequency than the previous year, with an all-around uplift observed across several key metrics:

- Transactions up **+9.7%**
- Total customers up **+4.8%**
- Spend per customer up **+8.1%**

Persons aged 75+ spend also grew within club venues by **+8.7%** year-over-year. The older demographic has always been a staple of the club industry, being one of the highest spend-per-customer groups. While these two segments were primary drivers for stronger growth, the most valuable demographic was persons aged 65-74, followed by 55-64, at the state level.

Non-Gaming Spend: YoY% Growth by Age Group (FY26)

Non-Gaming Spend: YoY% Growth By Age Group

Age Group	Spend	Transactions	Customers	Frequency	Spend Per Transaction	Spend Per Customer
18-24	13.2%	9.7%	4.8%	4.7%	3.2%	8.1%
25-34	2.0%	-0.2%	-0.9%	0.8%	2.2%	2.9%
35-44	2.1%	-0.6%	-0.7%	0.1%	2.8%	2.9%
45-54	1.3%	-0.6%	-0.5%	-0.1%	1.9%	1.8%
55-64	1.6%	-1.3%	-0.1%	-1.2%	2.9%	1.7%
65-74	4.9%	3.4%	1.8%	1.6%	1.5%	3.1%
75+	8.7%	6.7%	2.7%	3.9%	1.9%	5.9%

GY26 Trend

Yearly growth across discretionary spend remained strong in NSW, exceeding inflation, at **+7.7%**. While club venue sales growth trails the broader NSW average, as venues struggled to keep pace with cafes and pubs, taverns & bars, there was an observed improvement compared with GY25 (YoY growth “Registered NSW Clubs”: **+3.7%** in GY25 vs **+5.9%** in GY26).

Year-over-Year Growth

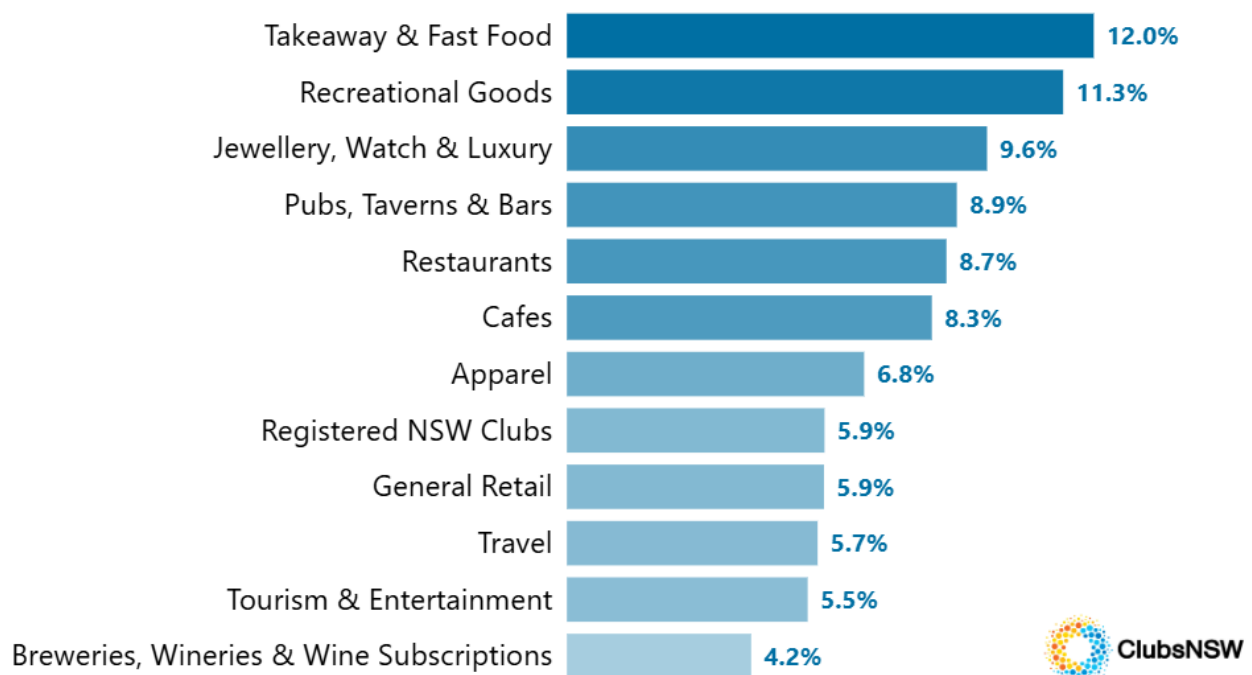

- Club Venues: **+5.9%**
- Pubs, Taverns & Bars: **+8.9%**

Gaming Performance

(NSW gaming year: Sep to Aug)

It's really been a tale of two halves. In the first half of the gaming year, club gaming performance was extremely strong, showing resilience in a higher inflationary and interest rate environment by generating an average yearly growth rate of **+8.5%**. The second half of the gaming year saw yearly growth slow, as clubs produced an average yearly growth rate of **+1.8%**. This slowdown occurred at the same time as elevated inflation, higher interest rates and increased geopolitical uncertainty; the direct contribution of each factor cannot be determined from the available data.

Performance Trend by State

(NSW gaming year: Sep to Aug for NSW & QLD)

- Other states trended like-for-like with NSW, meaning overall yearly growth remained strong; however, the speed of growth tapered off during the back half of the year.
- Gaming performance in QLD has retraced from a very high base (YoY gaming revenue growth in GY25: **+9.8%** to **+6.4%** in GY26).
- After a strong start to the gaming year, gaming performance within NSW has tapered off. While yearly growth is still outpacing inflation, it now sits slightly below GY25 levels, as gaming growth slowed within the club industry (**+6.4%** in GY26 vs **+7.6%** in GY25).
- As of July 2026, VIC is the only state showing a percentage-point increase in growth (**+5.0%** in GY26 vs **+4.1%** in GY25).

Note: At the time of this report, VIC does not include August data.

GY26 YoY Growth % Trend by State

Source: Liquor & Gaming NSW, Office of Liquor and Gaming Regulation QLD, Victorian Gambling and Casino Control Commission VIC

GY26 Lookback

The 2026 gaming year was a tale of two halves. Gaming performance was extremely strong as year-over-year growth notched 8.5% in the first half. However, that momentum slowed considerably across the second half of the year, as year-over-year gaming growth grew by just +1.8%.

While gaming growth slowed significantly in the last half of the gaming year, non-gaming spend within club venues remained resilient, suggesting that customers had shifted their preferences away from the gaming floor and toward other club offerings. This growth was primarily driven by cohorts aged 18-24 and 75+.

Looking ahead, profitability remains a key area of focus for the industry. With gaming growth slowing and operating conditions continuing to be influenced by elevated interest rates, higher inflation, and geopolitical pressures, clubs will need to remain efficient and flexible in how they manage costs and grow diversified revenue streams.
